

AquaFlow AF-300

Countertop Beverage Brewer — Product Manual

SYNTHETIC TEST DOCUMENT — created for RAG evaluation; not a real person or commercial product.

Overview

The AquaFlow AF-300 is a countertop beverage brewer with three brew modes and a removable 1.8-litre reservoir.

Safety

Place the brewer on a stable, dry surface. Do not operate with an empty reservoir. Allow the heating plate to cool before cleaning.

Operation

Fill the reservoir, insert the filter, select a brew mode, and press Start. Quick mode is intended for smaller servings.

Maintenance

Rinse the reusable filter after each use. Descale periodically when mineral buildup is visible or brewing performance declines.

Troubleshooting

If brewing stops, verify the reservoir is seated correctly and contains sufficient water. If the unit does not heat, disconnect power and contact authorized service.

Warranty

The AF-300 includes a 24-month limited warranty covering manufacturing defects under normal household use. Consumable wear and misuse are excluded.

Specification	Value
