

Priya Rajesh

AI Engineer

Professional Profile

AI Engineer with experience building retrieval-augmented applications, document-processing pipelines, and evaluation workflows for language-model systems. Interested in reliable agentic systems, semantic search, and practical machine-learning infrastructure.

Experience

Organization	Role	Period
Nexa Intelligence Labs	AI Engineer	2023–2026
BlueOrbit Systems	Machine Learning Engineer	2021–2023

Selected Work

- Designed a document question-answering service using hybrid lexical and vector retrieval.
- Built evaluation datasets for entity resolution, ambiguity handling, and conversational reference resolution.
- Developed Python services for ingestion, chunking, metadata tracking, and retrieval diagnostics.
- Worked with local language models and tool-using agent workflows.

Technical Skills

Python, SQL, LangGraph, LangChain, vector search, BM25, retrieval-augmented generation, NLP, machine learning, document processing, evaluation, REST APIs, Flask.

Education

M.Tech. in Artificial Intelligence — South Coast Institute of Technology, 2021

Additional Information

Primary interests: trustworthy AI systems, retrieval quality, agent evaluation, and human-centered AI applications.
