

Patient Admission and Discharge Procedures

1. Admission Process

All patients must be registered at the front desk prior to admission. Required documents include a valid photo ID, insurance card (if applicable), and a referral letter for specialist departments. Emergency admissions bypass standard registration and are processed directly through the Emergency Department triage desk.

2. Ward Allocation

Patients are allocated to wards based on the attending physician's assessment and bed availability. General ward stays are billed per night; private and semi-private rooms carry an additional daily surcharge as per the current rate card published by Billing.

3. Visiting Hours

Standard visiting hours are 11:00-13:00 and 17:00-19:00 daily. Intensive Care Unit visiting is restricted to immediate family, two visitors at a time, for 15 minutes per visit. Visiting hours may be suspended during infection control precautions.

4. Discharge Procedure

Discharge is authorized by the attending physician once clinical criteria are met. Patients receive a discharge summary, a medication list, and follow-up appointment details. Outstanding balances must be settled at the Billing counter prior to leaving the premises, though this may be deferred in emergency cases.

5. Medication and Follow-Up

Discharged patients are provided a 7-day supply of prescribed medication where applicable. Follow-up appointments are scheduled within 14 days of discharge for surgical patients and within 30 days for general medical admissions.

6. Patient Rights and Complaints

Patients have the right to access their medical records, request a second opinion, and lodge complaints regarding care quality through the Patient Relations office. Complaints are acknowledged within 48 hours and investigated within 15 working days.
